

Veranstaltungsverfahren: Sinfonie (symphony)

Info: Symphony is a logical sequence of known methods (e.g. mind mapping or systemic management). This way, the powers of the single methods are being combined to a single planning process.

Origin/ intention: The model was developed by denkmodell®. It unites well-proven techniques, names the single factors and reveals coherences.

Description:

Methods: Mindmap, matrix, systems diagram, axis-schemata, systemic interpretations, scenarios and many more.

Characteristics:

Strategy- or operational plans can be developed as well as the revealing of the own influence of the system.
